Media University
Berlin, Germany

SKILLS

- Mixed-Methods UX Research
- Human-AI Interaction & Agentic UX
- Trust in AI & Calibrated Trust
- Usability Testing & UX Evaluation
- UX Measurement
- AI-Assisted Prototyping (**Claude Code**)
- Research Analysis & Automation (**Dovetail**)
- **GitHub**, GitHub Actions & Workflow Automation
- Journey Mapping & Systems Thinking
- Stakeholder Facilitation & UX Enablement

ABOUT ME

UX Researcher with a background in psychology and experience across mixed-method research, UX measurement, and agentic AI. I translate user insights into practical product improvements and build AI-assisted prototypes, including tools focused on calibrated trust. Combining research expertise with Claude Code, Dovetail, and GitHub automation, I bridge user needs, design, and technology to create trustworthy experiences.

PROFESSIONAL EXPERIENCE

Jun 2025

–
Present

UX Researcher & UX/UI Designer

SAP | Berlin

- Built the Agent Trust Builder using Claude Code, translating calibrated-trust research into a functional AI agent.
- Designed and vibe-coded a UX Timeline platform, using GitHub Actions to automate the publication of team achievements.
- Lead GitHub enablement for approximately 40 UX researchers and designers through shared workflows, documentation, and hands-on training.
- Conduct mixed-method UX research and usability testing across SAP products using self-developed Dovetail agents.
- Collaborate across teams on context architecture, agent guardrails, and measurement approaches for trustworthy AI experiences.
